

Nabin Khair

Founding Engineer · AI Systems

nabinkhair12@gmail.com | GitHub | LinkedIn | nabinkhair.com.np

SUMMARY

Founding-level engineer building production AI systems end-to-end. Architects multi-subsystem AI platforms with multi-LLM orchestration (OpenAI, Anthropic, Gemini, Perplexity), edge infrastructure on Cloudflare Workers, and cutting-edge multi-cloud operations. Delivers deterministic, observable AI products from concept to production.

EXPERIENCE

Mersel AI

Forward Deployed Engineer (Full-time)

Remote

Nov 2025 – Present

Designed and shipped Mersel's full platform: the Cloudflare edge worker, the Python FastAPI service that handles LLM calls to OpenAI, Anthropic, Gemini, and Perplexity, the multi-tenant CMS, the scheduled job worker, and the Next.js dashboard. Owns deployments across Cloudflare, AWS, GCP, Supabase, and Railway.

Tulio Health

Software Engineer (Contract)

Remote

Aug 2025 – Dec 2025

Improved performance on the AI healthcare dashboard and prompt playground used by doctors and patients.

Set up authentication and authorization with Clerk; built the React components and wired them to the REST API.

Truly Care

Frontend Developer (Contract)

Remote

Jun 2025 – Aug 2025

Refactored the existing codebase so it was easier to extend and maintain.

Built the onboarding forms for speed and a smoother user flow, working with the backend team to wire them to the REST API.

FinFox

Frontend Developer & UI/UX Designer (Full-time)

Remote

May 2025 – Aug 2025

Led frontend and UI/UX work for a fintech SaaS platform.

Worked with the backend team to integrate APIs across the product's financial workflows.

Uncle Sams Tech

Web Developer (Part-time)

Remote

Mar 2024 – May 2025

Built backend services for a short-form video sharing mobile app.

Improved web performance and SEO on several products, and designed UI/UX prototypes for a handful of mobile and web apps.

PROJECTS

GitChat: A chat-based GitHub client. Uses tool calls to let an LLM browse repos, review PRs, and trigger CI workflows, with a confirmation step before anything destructive.

Assets Man: An open-source, self-hosted alternative to Google Drive. Handles file storage, sharing, and organization.

FlowMint: Turns a natural-language prompt into a diagram you can share. The LLM does the parsing; the renderer turns it into something shareable.

Better Form: A dynamic form builder for React and Next.js with type-safe validation. Built for developer experience.

Fastly: A SaaS starter kit with auth and payments already wired in.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Bash, C++

Frontend & Backend: Next.js, React, Node.js, Express, FastAPI, TanStack Query, Zod, shadcn/ui, Tailwind, Playwright, Better Auth

Databases & Infrastructure: PostgreSQL, Drizzle, MongoDB, Redis, Supabase, Cloudflare (Workers, KV, R2), AWS (EC2, S3), GCP (Cloud Run, Vertex AI), Railway, Vercel, Docker, GitHub Actions

AI / LLM: OpenAI, Anthropic Claude, Google Gemini, Perplexity, Vertex AI, LLM orchestration, agent harness design, MCP, tool calling, prompt engineering

EDUCATION

IOE Purwanchal Campus

Bachelor of Computer Engineering

Dharan, Nepal

2023 – 2027
