

Nabin Khair

AI Full-Stack Engineer · LLM Systems
nabinkhair12@gmail.com | GitHub | LinkedIn | nabinkhair.com.np

SUMMARY

AI full-stack engineer who builds and ships production AI products end-to-end — from React/Next.js interfaces to Python/FastAPI services, multi-LLM orchestration, and multi-cloud deployment. Specializes in LLM systems: autonomous agents, tool calling, and MCP, with a focus on deterministic, observable, reliable AI in production. A high-ownership builder who takes an ambiguous problem from concept to a deployed product people actually use.

EXPERIENCE

Mersel AI

Forward Deployed Engineer (Full-time)

Remote

Nov 2025 – Present

Built and shipped Mersel's full AI platform end-to-end: a Python/FastAPI service orchestrating multi-LLM pipelines (OpenAI, Anthropic, Gemini, Perplexity), a Cloudflare edge worker, a multi-tenant CMS, a scheduled job worker, and the Next.js dashboard. Designed autonomous, tool-calling agent workflows with structured, deterministic outputs and guardrails against hallucination. Own deployment and operations across Cloudflare, AWS, GCP, Supabase, and Railway — responsible for performance, reliability, and observability under real traffic.

Tulio Health

Software Engineer (Contract)

Remote

Aug 2025 – Dec 2025

Improved the performance of an AI healthcare product — the dashboard and LLM prompt playground used by doctors and patients. Built React components, integrated REST APIs, and set up authentication and authorization with Clerk.

FinFox

Frontend Developer & UI/UX Designer (Full-time)

Remote

May 2025 – Aug 2025

Led frontend and UI/UX for a fintech SaaS platform and integrated APIs across its financial workflows.

Truly Care

Frontend Developer (Contract)

Remote

Jun 2025 – Aug 2025

Refactored the frontend codebase for maintainability and built onboarding forms wired to the REST API for a smoother user flow.

Uncle Sams Tech

Web Developer (Part-time)

Remote

Mar 2024 – May 2025

Built backend services for a short-form video app and improved web performance and SEO across several products.

PROJECTS

GitChat: An autonomous, chat-based GitHub agent. Uses LLM tool calls to browse repos, review PRs, and trigger CI workflows, with a confirmation step before anything destructive.

Tallwatch: A distributed uptime monitoring platform. Runs low-latency consensus checks across 6 global regions before alerting to cut false positives, with real-time dashboards and incident timelines. Node.js, PostgreSQL, Cloudflare, AWS.

FlowMint: Turns a natural-language prompt into an interactive, shareable diagram — the LLM parses ambiguous intent into structured output, the renderer makes it shareable.

Better Form: A type-safe dynamic form builder for React and Next.js, built for developer experience — a reusable UI system with schema-driven validation.

Pro MCP & nk-skills: An MCP server registry plus a library of reusable agent skills — infrastructure for connecting tools and data sources to LLMs and extending agent workflows.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, Bash

AI / LLM: OpenAI, Anthropic Claude, Google Gemini, Perplexity, Vertex AI, LLM orchestration, autonomous agents, agent harness design, MCP, tool calling, prompt engineering

Frontend: React, Next.js, TanStack Query, Zod, Tailwind, shadcn/ui, Playwright, Better Auth

Backend & APIs: Node.js, Express, FastAPI, REST APIs, PostgreSQL, Drizzle, MongoDB, Redis, Supabase

Cloud & DevOps: Cloudflare (Workers, KV, R2), AWS (EC2, S3), GCP (Cloud Run, Vertex AI), Vercel, Railway, Docker, Git & GitHub, GitHub Actions

EDUCATION

IOE Purwanchal Campus

Bachelor of Computer Engineering

Dharan, Nepal

2023 – 2027
